

TECHNICAL SHEET

Elyson®

NSG 48

PLANT

Type	short-day
Vegetative habitus	semi-upright
Foliar density	medium
Earliness	medium-high
Production	around 700-800 g/plant
Vigor	high
Flower disposition	above the leaf mass

FRUIT

Shape	conical-elongated
Caliber	medium-large
Skin color	bright red even in winter
Pulp color	medium red
Pulp consistency	high
Ripening period	from the second week of January to June
Sugar level	from 10 to 12 degrees Brix
Shelf life	high
